

PRESS RELEASE

International Fair Climatherm – Energy 22 – 25 February 2018

Less than two months left until the international exhibition "**Climatherm - Energy 2018**". The most important and largest companies in the energy sector are working feverishly in order to welcome all the professional visitors of the sector, making this international organization preserve its stability in value, as the best provider for knowledge in energy supply, for variety of new products and possible future synergies among the best professionals of the Greek energy sector.

The largest specialized exhibition of the energy industry in Greece, Climatherm - Energy, is under the auspices of the Ministry of the Environment and Energy, giving it power, as the largest reference meeting point for professionals. Therefore, visitors will have the opportunity to see a wide range of products in areas such as Renewable Energy, Photovoltaics, Biomass, Geothermal, Gas - LPG, Air Conditioning, Economic Heating, Energy fireplaces, pellet burners, ventilation, industrial cooling, energy upgrading of buildings, solar energy, water supply and desalination. It is also very important to be mentioned that during the exhibition, presentations and workshops will be held, as for example the ones of "**PSDM-H**", "**THERMOLA**" company, "**GREEK FEDERATION OF REFRIGERANTS**" and "**TENORA TEXNIKI**" company in order to inform and upgrade the knowledge of both our visitors and our exhibitors.

The aim of Project LTD. is, as always, to maintain the specialization of the International "**Climatherm – Energy**" exhibition, by being held at "**Athens Metropolitan Expo**", a high - standard exhibition center, and to properly advertise with targeted communication with the trade and professional audience. Features that will, once again, make "Climatherm - Energy 2018" the biggest international specialized exhibition in Greece.

Do not miss the chance to attend, whether as a guest or a visitor, this big event, named "**Climatherm Energy**".
